With the rapid changes regarding COVID-19, it can be difficult to stay up to date with all that is happening in our islands. The Hawai'i Public Health Institute (HIPHI) will be offering a series of webinars on the impact of COVID-19 on our communities.

This webinar will discuss the higher rates of COVID-19 cases among Native Hawaiian and Pacific Islanders, the socioeconomic and social determinants of health underlying these higher rates, and the actions taken to date, and yet needed, to address this issue at the local and national level.
