ADDENDUM #2 (as of July 29, 2020)  

to the Emergency Meal Services Plus Request for Proposals (RFP) document

This addendum includes two changes which are as follow:

1. After further review and consideration, this addendum change will apply to the criteria for proposal review addressing the 20% requirement for locally sourced food for projects.

   New change: We highly encourage applicants to have food used for the project be locally sourced (locally grown produce or locally sourced protein), but not required. We do recognize the additional barriers that come with the expectation to utilize locally grown produce or locally sourced protein in projects, however, it was not the intention to create burden. These funds are intended to serve and reach a broad scale of vulnerable populations within the City and County of Honolulu in these times of need and major uncertainties due to COVID-19 pandemic.

2. With regards to the proposal deadline.

   New change: We are extending the deadline to August 3, 2020 by 5:00PM.

We appreciate the feedback and the questions that have been raised for this funding and hope this addendum helps relieve some barriers that may have been unintentionally created.
