What steps do you think our state and/or counties should take to aid this recovery? Some examples could include how you think federal funds should be spent, diversifying the state's economy, etc.

Getting inbound flights to the islands tested before entering the state. This will help with the security of the public health.

Q9

Please share some of the efforts you have led or participated in response to COVID-19.

We have lead the conversation in getting inbound flight tests. Our candidate pushed for 5 minute test kits to help restore Hawaii's tourism.

Also we have secured liberty in contact tracing when needed and implementing better public health guidelines.

Q10

Additional thoughts/comments:

Noelle believes in the implementation of better public health guidelines as a new health infrastructure. We take the public health and well being of our Hawaii seriously.

Now more than ever we need leaders who really care about the health, wellbeing, and safety of their constituents. Stand with me Noelle Famera this election.

Q14

What steps do you think the state and/or counties should take to ensure food security for all of Hawaii's people, and to significantly increase food self-sufficiency for our state?

Including Farm to school programs will ensure our students are learning to farm while also learning to support local farms. This red uses cost for our educational system and food shipments which will increase a sustainable food source on our islands.

In 2019, Hawai'i made a commitment to adopt Vision Zero, an initiative to eliminate all traffic fatalities and severe injuries, while increasing safe, healthy, equitable mobility for all. What policies and infrastructure changes should the state and/or counties make to achieve this goal?

Please indicate your position on the following policies:

- We must significantly increase public investment in food systems workforce development, including programs such as farm to school, agriculture and food systems education (PreK-12 and higher education), and farmer training programs.

Strongly Support
- Fluoridation of community water supplies is an effective way to prevent tooth decay.

Strongly Oppose

I strongly oppose contaminating the city water supply with fluoride. Data has showed the exposure to this chemical on the skin and drinking, isn't safe for the public health. We do agree with our constituents on getting people the appropriate dental care they need to live a healthy life as a more moral humane alternative, instead of putting a neurotoxin in the city water.

We would like to see the data on legalization and collect tax revenues for our state .Using hemp in many ways.

In other states and counties they saw a decrease in substance abuse and crime. Specifically Brazil, and we know with proper regulation we can approach a new economic outlet for Hawaii in legalization for recreational use.

Q24

What are your immediate plans to help make Hawai'i more affordable for its residents?

Putting a max deposit of \$500 for new move in's when it comes to landlord tenant laws. This will help people to move and also save Money, to move to new places. Regulating housing and building more sustainable communities should lower the lost of living. Repealing the Jones Act will also lower the cost of supplies that residents pay for. Implementing clean energy will lower energy costs.

Q25

What is the role of government in addressing housing affordability issues and what would you do to encourage the production of more affordable homes for Hawai'i residents?

Building affordable home's with sustainability in mind is key. Helping the homeless live in sustainable community's Farms, that serve as Farm to school programs or Farm to Table in our retirement homes, we can lower housing costs for those who need it most and give those an outlet to be of service to the community and have proper sanitation and job training.

Cracking down on short-term rentals and vacation rentals that are competing with housing.
