

Our Mission:
To link resources that inspires our diverse communities to reduce tobacco use and exposure.

Tobacco-Free Hawai'i Island (TFHI) is a community-based alliance made up of dedicated community health partners, government agencies, non-profit organizations, local businesses, and passionate individuals committed to collaborating and creating a collective impact to reduce tobacco use and the negative impact it has in Hawai'i County. **TO JOIN TFHI TODAY** click here: [TFHI Membership Form](#)

We do this through cultivating programs, policy and system changes via education, advocacy, research, capacity building and training—to the environments where people live, learn, work, age, and play. Our primary objectives include:

- Prevention of youth initiation of tobacco/vape products
- Promoting adult & youth nicotine addiction treatment and resources
- Eliminating exposure to second-hand smoke/vape aerosol.
- Eliminating disparities in tobacco/vape use among the population.
- Building and strengthening capacity in our community through trainings, professional development and networking
- Building youth leadership skills through advocacy and community engagement

For more information contact: Hawai'i Island Community Coordinator Jahkotta Lewis at jahkotta@hiphi.org. TO JOIN click here: [TFHI Membership Form](#)

TFHI is a program of the Hawai'i Public Health Institute (HIPHI) and funded by the Department of Health, Tobacco Prevention Education program and the Tobacco Trust Fund.
